

**DISEASE:**

**Intrauterine growth restriction-short stature-early adult-onset diabetes syndrome**

<b>NAME:</b>	Intrauterine growth restriction-short stature-early adult-onset diabetes syndrome
<b>DESCRIPTION:</b>	A rare genetic endocrine disease characterized by intrauterine growth restriction, failure of an adolescent growth spurt with proportional adult short stature, insulin resistance, and early adulthood-onset diabetes. Minimal subluxation of the fifth metacarpal-phalangeal joint has been reported, while metaphyseal dysplasia is absent. Testicular volume is low, but fertility is normal. There is no evidence of primary adrenal insufficiency.
<b>ORPHACODE:</b>	436144
