

**DISEASE:**  
**Sotos syndrome**

|                     |                                                                                                                                                      |
|---------------------|------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>NAME:</b>        | Sotos syndrome                                                                                                                                       |
| <b>DESCRIPTION:</b> | A rare genetic overgrowth syndrome characterized by a typical facial appearance, overgrowth with macrocephaly and variable intellectual impairment.  |
| <b>ORPHACODE:</b>   | 821                                                                                                                                                  |
| <b>SYNONYMS:</b>    | Cerebral gigantism                                                                                                                                   |
| <b>XREF(S):</b>     | <a href="#">Orphanet</a><br><a href="#">ICD-10</a><br><a href="#">MeSH</a><br><a href="#">MedDRA</a><br><a href="#">OMIM</a><br><a href="#">OMIM</a> |
| <b>ANALYTE(S):</b>  | <a href="#">NSD1</a><br><a href="#">SETD2</a><br><a href="#">APC2</a>                                                                                |
| <b>CREATED:</b>     | 13 May 2019 - 01:02                                                                                                                                  |
| <b>CHANGED:</b>     | 22 Jun 2023 - 16:14                                                                                                                                  |
