

## GENETIC TEST:

### Hereditary angioneurotic edema (2 genes)

|                                   |                                                                                                      |
|-----------------------------------|------------------------------------------------------------------------------------------------------|
| <b>FULL NAME:</b>                 | Hereditary angioneurotic edema (2 genes)                                                             |
| <b>TEST TYPE:</b>                 | Clinical                                                                                             |
| <b>TEST SPECIALTY:</b>            | Molecular Genetics                                                                                   |
| <b>TEST PURPOSE:</b>              | Mutation confirmation,<br>Post-natal Diagnosis                                                       |
| <b>SPECIMEN:</b>                  | Peripheral (whole) blood on EDTA,<br>DNA                                                             |
| <b>METHOD CATEGORY:</b>           | Sequence analysis: entire coding region<br>Deletion/duplication analysis                             |
| <b>METHOD TECHNIQUE:</b>          | Next Generation Sequencing (NGS)<br>MLPA based techniques<br>Bi-directional Sanger Sequence analysis |
| <b>RIZIV CODE:</b>                | 565471-565482                                                                                        |
| <b>ACCREDITATION (ISO 15189):</b> | 2022-12-22 / 2027-12-21                                                                              |
| <b>TURNAROUND TIME (MAXIMUM):</b> | 3 months                                                                                             |

|                 |                     |
|-----------------|---------------------|
