**GENETIC TEST:**  
**Cutis Laxa / Geroderma osteodysplasticum (gene panel)**

|                                   |                                                                          |
|-----------------------------------|--------------------------------------------------------------------------|
| <b>FULL NAME:</b>                 | Cutis Laxa / Geroderma osteodysplasticum (gene panel)                    |
| <b>TEST TYPE:</b>                 | Clinical                                                                 |
| <b>TEST SPECIALTY:</b>            | Molecular Genetics                                                       |
| <b>TEST PURPOSE:</b>              | Post-natal Diagnosis                                                     |
| <b>SPECIMEN:</b>                  | Peripheral (whole) blood on EDTA                                         |
| <b>METHOD CATEGORY:</b>           | Sequence analysis: entire coding region<br>Deletion/duplication analysis |
| <b>METHOD TECHNIQUE:</b>          | Next Generation Sequencing (NGS)                                         |
| <b>RIZIV CODE:</b>                | 565471-565482                                                            |
| <b>TURNAROUND TIME (MAXIMUM):</b> | 8 weeks                                                                  |
| <b>CREATED:</b>                   | 29 Jul 2019 - 14:41                                                      |
| <b>CHANGED:</b>                   | 14 Dec 2022 - 14:40                                                      |
